```
//node_01  
}  
location established within network  
panels are attached to members  
concrete wraps edges of panels  
locking them in place  
}
```

```
//construction process  
}  
synapse rods connect the network with perforated pipes  
concrete is pumped into network and allowed to bleed through holes  
pipes become rebar after coated in concrete  
}
```
